

MERUS GmbH | Ziegelstraße 1 | D-71063 Sindelfingen

Dear

Customer

Sindelfingen, August 2009

Letter of conformity

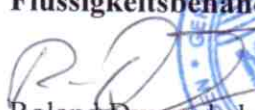

All Merus products are working with a natural method, using interfering oscillations originating out of the natural molecular movement.

The treated water is chemically not changed; the devices are not in direct contact with the water.

The Merus products are manufactured with the highest possible care, using light and oscillations. No radiation, no radioactivity or other harmful effects are produced by our devices.

Merus is used in a lot of ex-proof areas, like in refineries, offshore platforms, etc. Merus is manufactured out of full material aluminium (AlMgSi1), there are no active parts or an electrical power supply included, there are no known possibilities of sparks, when using at common pipe materials.
