

Passive...

No power source

No running costs

No maintenance!

Suitable for All Water Bearing Systems

BEFORE

The pipe below shows almost 50% lime scale, rust and sludge build up, which reduces Volume and increases running costs.

AFTER

In this case, just 45 days after a simple installation of the Merus ring, the system is cleared, and returned to original design volumes. The cost of running the system has also decreased dramatically.

Maintenance...

Water Treatment

Prevent rust & limescale

Save Energy, Money, Downtime

The Merus Ring is an amazing device that is transforming the water treatment industry. With over 10,000 successful installations worldwide the effectiveness of Merus technology is set to become an industry standard. The Merus ring consumes no power, has no moving parts is easy to install and uses water itself in the fight against rust, limescale and bio fouling, including Legionella Disease. This unique technology delivers Active Oscillations to the water as it passes through the Merus ring. These oscillations will reach throughout the entire system, even into dead legs of pipe. The Merus oscillation technology...

- 1 - Interrupts the cycle required for rust, limescale, and bio-fouling to form.
- 2 - Returns existing rust, limescale or bio-fouling back into suspension, allowing the system to be flushed clean.
- 3 - Deposits an oxide protective coating on the inside of the metal pipe once all rust and limescale is removed.

All Water Bearing Systems, including

Heat exchangers	Hotels
Cooling loops	Hospitals
Evaporators	Factories
Condensate systems	Schools
Steam boilers	Homes
Water Fountains	Mining
Swimming Pools	Refineries
Sewage treatment plants	Food Production
Sprinkler systems	Shipping
Town and city water supplies	Water
Pump and motor cooling loops	Petroleum
Seawater boiler / evaporator	PET bottle production

Merus technology can also be applied to Petroleum Pipelines to inhibit the buildup of parafin waxes. For this specialist area, please ask us to discuss this further with you.

No Maintenance Required - No moving parts

No Power Required - Completely passive protection

5 Year Guarantee - Re-charging options

Available in Australia and NZ from Maintenance Products Australia.
